

WaveOne Gold™

Designed for Predictability and Safety

Engineered with the latest reciprocating technology

The single-file simplicity of WaveOne Gold™. Made with advanced metallurgy, it is the next generation of performance from Dentsply Sirona.

- WaveOne Gold™ increases patient safety, while reducing shaping time by 53% across a wide range of cases.*
- Optimized with enhanced design features by leading endodontists
- Part of a complete solution that includes obturation products designed to match the shapes created by WaveOne Gold™ files
- The WaveOne Gold™ family includes a single glide path file with reciprocating motion for simplicity from the start
- Reduces cyclical fatigue on the instrument. Gives safer and more reproducible outcomes.

WaveOne Gold™

Simplicity for you, safety for patients

Pre-sterile is the new standard.

- A full 90% of patients agree that sterilization is one of their top concerns when visiting a dental office today.** Our line of pre-sterilized instruments eliminates cross-contamination risks from inconsistent sterilization processes for patient confidence and time savings at every step.

Reinforces patient safety

- WaveOne Gold™ Primary file is 50% more resistant to cyclic fatigue than WaveOne Primary file
- Reduced screwing effect* compared to standard rotary systems

Shortens canal shaping time

- Takes cutting efficiency to a higher level
- A single file per treatment translates into time savings for canal shaping and irrigation

Covers a wider* range of canal morphologies

- Enhanced file flexibility thanks to the Gold technology
- Extended size range (Small, Primary, Medium, Large)

Dr. Myriam Taveras, General Practitioner, Sunrise, Florida, USA

“Since I transitioned from a Rotary System to a Reciprocation System with WaveOne Gold™ I feel more confident on the outcomes of my cases due to the lack of procedural errors as well as I can finalize all my cases in one hour appointment. The quality of these instruments surpasses the competitors and the support from DS are equal to none”.

Approximately 90% of patients surveyed

expect their dentist to use single-use products now.***

The design team speaks - (left to right) Dr. C. Ruddle, Dr. J. Webber, Dr. W. Pertot, Dr. S. Kuttler

WaveOne has helped saved over **30 million teeth** and counting

Shaping canals has never been easier

“It all started with a question. Could we develop an endodontic instrument that would make shaping speedier, safer and simpler than all the others? This is the clinical goal that guided us throughout this project and resulted in WaveOne Gold™.”

WaveOne Gold™ brings to the endodontic procedure a metallurgically advanced single-file technique for shaping canals. Further, we optimized the tip diameters, tapers, and the cross-section to produce a file that really improves safety, efficiency and flexibility when preparing canals. WaveOne Gold™ takes simplicity and treatment success to another level.

With over 400 scientific studies citing WaveOne Gold™ worldwide, it is one of the most researched products.

“This file system has withstood the test of time and continues to be an extremely safe and effective method of cleaning and shaping canals.”

Longtime user of WaveOne Gold™, endodontist Blair Johnson, DDS

One complete solution

The WaveOne Gold™ family of products provides a comprehensive treatment solution to promote confidence and predictable shape.

With the addition of a glide path file, WaveOne Gold™ gives you the convenience of an entire family of products designed to work together, right from the start.

WaveOne Gold™ Solution Kit

- 1 X-Smart IQ™ Endo Motor Basic Starter Kit* XSIQEM1BSK
- 1 GuttaCore® Oven HTR-GC
- 5 Packs WaveOne Gold™ Reciprocating Files, WGPRIME25 3-Pack, Primary
- 5 Packs WaveOne Gold™ Glider Glide Path Files, TSTW1GG325015 3-Pack, 25mm
- 3 Packs of GuttaCore® for WaveOne Gold™ TNSGCWG500PRI Obturators, 5-Pack, Primary
- 1 Bottle QMix® 2in1 Irrigating Solution (60mL) QMIX60ML
- 1 Pack of WaveOne Gold™ Absorbent Points, WGAPSP Sterilized, 180-Pack, Primary

X-Smart IQ™ is pre-programmed for use with WaveOne Gold™ for simplicity

The WaveOne Gold™ Glider optimizes your glide path before shaping with WaveOne Gold™ Primary**

WaveOne Gold™ shaping files are available in four sizes with three working lengths (21, 25, 31 mm) to treat a wide range of cases

Dedicated WaveOne Gold™ obturation products include paper points, variable tapered Conform Fit™ gutta-percha points and GuttaCore® Crosslinked Gutta-Percha Core Obturators

Create your path with confidence

WaveOne Gold™ Glider

Optimize your shaping preparation with a single reciprocating glide path file that is part of the WaveOne Gold™ solution.

- Respects the natural shape of the canal
- Increases patient safety with enhanced flexibility and resistance to cyclic fatigue
- **Sterile and ready for single use**, which preserves cutting efficiency, reduces breakage and prevents cross contamination

The WaveOne Gold™ Glider is only for use in reciprocating motion with compatible Dentsply Sirona motors. Helpful pre-programmed motor settings are available.

Same cross section as the WaveOne Gold™ shaping files

For a majority of your cases

80% of the time, shape with a single WaveOne Gold™ Primary file.**

WaveOne Gold™ Gutta-Percha, paper points and GuttaCore® for WaveOne Gold™

Conform Fit™

WaveOne Gold™ Gutta-Percha Master Cones reformulated to match the precise shapes created by the WaveOne Gold™ instruments.

- +22% Superior apical gutta-percha point filling volume*
- Improved heat transfer up to 4mm
- Variable taper
- Precise fit and accurate tug back
- Latex free for patient safety
- Part of a system based solution

Paper points

- Paper points are packaged in individual sterile packs of 5 points
- Ready to use, part of a total system solution for simple identification

GuttaCore® for WaveOne Gold™

GuttaCore® obturators feature a crosslinked gutta-percha core that sends the surrounding warm, flowable gutta-percha 3-dimensionally to follow the natural canal anatomy.

- An efficient technique that offers the ease of a single insertion, so your patients spend less time in your chair.
- The flowability of warm gutta-percha to achieve a complete fill throughout the canal system.
- The confidence of knowing GuttaCore® travels where traditional cold gutta-percha stops short.

Clearly identifiable: same color code as the file. 4 sizes (small, primary, medium, large) and improved dimensional stability **up to 40% compared to traditional hand rolled gutta-percha** with the related WaveOne Gold™ files.
